

Ergonomic Pedals

Ergonomic pedals have a very low-profile for healthy stand-up sewing/activation, permitting the operator to balance his/her weight on both legs. Various models provide single, two-stage and three stage activation of cycling machines or multi-functional control of sewing equipment (low and high speed, trim, and footlift). Pedals match Americas 21st Inc. stand and table color and are comparable with its slide pedal bar. Many configurations by way of custom made harnesses, speed controls, etc.

SPECIFICATIONS/FEATURES

Single One-Stage	One-stage function activation in air or electric configurations
Single Two-Stage	Two-stage function for positioning, then activation in air or electric configuration
Single Three-Stage	Three-stage function for positioning, hold and then activation in air or electric configuration
Four-Position	Electric with four functions (low, high speed; trim, foot lift)

Pedals can interface with most machines. Call with your specific needs.
